The exploding demand for faster, higher-capacity data transfer capabilities has made PCIe (Peripheral Component Interconnect Express) more important than ever. Low-latency performance, scalability, hot swappability and support for high-speed performance make PCIe an important standard for a variety of applications. Molex is an innovative leader in PCI-SIG-standard solutions, with a broad portfolio covering multiple generations including PCIe Gen 5.0, Gen. 6.0 and Gen. 7.0.
